

Administrator Gina McCarthy Houston Visit

Issue: San Jacinto River Waste Pits Superfund Site, Harris County, Texas

Background/Status: The Site includes of a set of impoundments built in the mid-1960s for disposal of paper mill pulp wastes containing dioxin. In 2008 the Site was added to the National Priorities List (NPL) and in 2009 EPA issued a Unilateral Administrative Order to International Paper Company and McGinnes Industrial Maintenance Corporation, the Potentially Responsible Parties for the Site, to conduct a Remedial Investigation and Feasibility Study. A Superfund time-critical removal action was completed in July of 2011 to place an armor rock cap to prevent the further release of dioxins into the environment. A compromised area of the cap was discovered and repaired in December 2015.

Message:

- Completion of the Site investigation and assessment of cleanup alternatives is expected this year. The Record of Decision, which selects the Site remedy, will follow in 2017. The community believes that the contaminated material should be removed from the San Jacinto River.
- The EPA co-leads a Site Community Advisory Committee, including the Texas Commission on Environmental Quality, Harris County, the Port of Houston, Galveston Bay Foundation, Texans Together, and the Potentially Responsible Parties.
- The Community Advisory Committee was developed in 2011 as part of the Community Engagement Initiative's efforts to improve stakeholder participation. The group has met frequently to update all site issues focusing on the technical work as well as addressing community concerns including health and safety. The group has also provided elected officials briefings.
